Information above has only recommending purpose.

* heating in microwave possible up to +100°C, for roughly 5 minutes

Product groups featuring this symbol are biodegradable and especially environmentally friendly due to composting.

These products are made from common natural materials (wood, bamboo, paper, cardboard) or innovative bioplastics (e. g. PLA). The latter are designed especially for industrial composting.

Wood & bamboo

Material: Wood and bamboo are fully renewable natural resources. Wood has one of the best ecobalances of all the materials on our planet. The materials we sell come from planned logging, which ensures the viable management of forests around the world.

Application: Wooden and bamboo products have a very wide range of applications, including our area in gastronomy. All products are suitable for contact with food and they are without any chemical modifications.

Storage: Dry storage without direct sunlight.

Disposal: Home composting, brown BIO bins or municipal waste.

(Bamboo) 23 cm
66785 20 x 50 pcs

Bio-composite

- Material:** Bio-composite is based on all-natural materials. Saw-dust (as a by-product from wood processing) is blended with the polymer PHB (V), which is formed by fermentation, plus a mixture of natural minerals to improve mechanical properties.
- Usage:** The unique feature of bio-composite products is the optimum balance between functionality and disposability. They are certified for direct contact with food, both hot and cold (the thermal range is 0 to +100 °C), and can return to nature via home-composting.
- Storage:** Store in dry conditions away from direct sunlight.
- Disposal:** Domestic composting, household waste or municipal waste.

BIO-COMPOSITE CUTLERY

V0022

Spoon, natural brown
(Bio-composite) 17 cm
40006  20 x 50 pcs

BIO-COMPOSITE STRAWS

V0040

Straw, natural brown
(Bio-composite) Ø 8 mm x 25 cm
40621  7 x 100 pcs

Bio-composite products are intended to replace single-use plastic in everyday situations with a sustainable all-natural alternative. Unlike bio-plastics, bio-composites return to nature without the need for industrial composting. The primary raw material is secondary saw-dust (60%) bound with a natural polymer produced via fermentation. The resulting material can be extruded or injection moulded to produce fully-functional, all-natural alternatives to typical plastic items such as straws and cutlery. Whether in a home-composter, on the forest floor, or in the ocean, bio-composite products will degrade and decompose to return to nature with zero pollution.

PLA, CPLA

Material: Polylactic acid, PLA or C-PLA for short, is a bioplastic made from plant starch. PLA is degradable and much more environmentally friendly. The production of bioplastics is only slightly different from the production of common petroleum plastics.

Application: These biodegradable plastics are especially welcome in the field of medical technology, or for the production of disposable tableware, such as beverage cups, cutlery, etc. The material is suitable for contact with food, but is not suitable for microwave ovens because of its temperature range which is from -20 °C to +40 °C, for C-PLA it is -20 to +70 °C.

Storage: Dry storage at max. 30 °C, beware of direct sunlight (material could deteriorate).

Disposal: Industrial composting or municipal waste.

green

🍵 BIO-PLASTIC DRINKING CUPS

V0022  max. 40 °C

Cup, BIO, transparent
(PLA) Ø 48 mm 2 cl / 4 cl
P3040  20 x 40 pcs

Cup, BIO, transparent
(PLA) Ø 70 mm 150 ml
76300  30 x 100 pcs

Cup, BIO, transparent
(PLA) Ø 70 mm 180 ml
76301  30 x 100 pcs

Cup, BIO, transparent
(PLA) Ø 70 mm 0,2 L
76302  30 x 100 pcs
43002  30 x 10 pcs

Cup, BIO, transparent
(PLA) Ø 84 mm 0,3 L
76313  20 x 50 pcs
43003  24 x 10 pcs

Cup, BIO, transparent
(PLA) Ø 102 mm 0,5 L
76315  14 x 50 pcs
43005  24 x 10 pcs

 max. 70 °C

Cup, BIO, natural
(CPLA) Ø 57 mm 100 ml
76310  20 x 50 pcs

Products made from PLA and CPLA look exactly like conventional plastic based on fossil oil. Nevertheless the big difference is that they are fully biodegradable and decompose to their natural components through industrial composting.

V0012

Sipping lid, BIO, white
(CPLA) Ø 80 mm
76593  10 x 100 pcs

Ideal for cup
76528 and 82428

PLA, CPLA

Products made from PLA and CPLA look exactly like conventional plastic based on fossil oil. Nevertheless the big difference is that they are fully biodegradable and decompose to their natural components through industrial composting.

Paper

Material: Paper is one of the materials used for millennia. We offer products from either plain or corrugated cardboard. Furthermore, recycled or virgin paper (cellulose). The paper is 100% biodegradable.

Application: Paper products are suitable for contact with food, for a short time (max. 5 min.) They are suitable for microwave ovens. Temperature range -40 to +180 °C

Storage: Dry storage without direct sunlight.

Disposal: Home composting, blue bins or municipal waste.

Greaseproof paper, sheet
(PAP) 50 x 75 cm `1/2`
90050 1 x 500 pcs

Greaseproof and barrier paper is an excellent material for food packaging.

The surface treatment of the paper not only allows for safe packaging, but also allows food to breathe. Taste and visual degradation of the food is therefore much slower.

This material is a great substitute for problematic multi-layer materials such as recycled paper coated with polyethylene film.

WRAPPING PAPER

Wrapping-paper roll, brown

90000 1 x 1 pc

Sugar cane

Material: The sugar cane plant belongs to the grass family. Our dishes are made from stems and leaves (ie from residual materials) by pressing. The stems have a diameter of 20 to 45 mm and reach a height of up to 5 m. The plants grow within one year. They are 100% biodegradable, compostable and without any chemical treatment.

Application: Disposable sugar cane products themselves, not only from a biological point of view, show incredible properties of use. They are stable, have a smooth fine surface, are suitable for contact with food, for a short time (max. 5 min.), are suitable for a microwave oven. Temperature range -40 to +180 °C.

Storage: Dry storage without direct sunlight.

Disposal: Home composting, brown BIO bins or municipal waste.
